Medical Transcription: Abroad, any patient and doctor interaction needs to be documented for insurance purpose. After a patient meets a doctor, the doctor dictates a report on the meeting via Dictaphone or mobile and this recorded voice file needs to be listened to and typed without errors for documentation. This is called medical transcription. This voice file is outsourced to India owing to good English skills among Indians & 24 hour turnaround time.

Earning Potential: Home-based/office-based/part-time career opportunities is very much possible upon completion of the online MT training. If you can work dedicatedly from home full-time (8 hours) or part-time (4 hours), the average earning potential is Rs. 30,000 and Rs. 20,000 respectively as an MLS (medical language specialist). Subsequent levels are Non-Edit (direct upload)/Editor/QC/QA who review and grade the transcribed files have an earning potential of Rs. 35,000 to 45,000 for part time (4 hours) and Rs. 45,000 to 65,000 for full time (8 hours).

Training Info: Azimuth Academy LMS (learning management system) is an online e-learning program with 24/7 login access. Our Online Medical Transcription Program adheres to the AHDI (Association for Healthcare Documentation and Integrity) international standards. It can be completed in 1-6 months' time depending on the candidate's caliber and dedication. The training is completely online in the e-learning style and comprises modules for American English, Medical Transcription Theory, and Language of Medicine. On the whole, it is a 1000-hour program (750 hours basic + 250 hours advanced) dealing with all the systems of the human body.

The course can be taken from anywhere at any time as there is no time restriction. Once enrolled, you will be provided with a link, username, and password to login and study. Our practice files, which are more than 250 in number, expose you to accents of doctors from various nationalities based in the US train you aggressively to become a professional right away. The course is designed such that candidates from both science and non-science backgrounds can easily understand and master medical terminology to become a successful MLS.
